YOUR CLOUD. YOUR WAY.

cutting-edge technology more security, more stability

CL8 operates the latest state-of-the-art data center in Cyprus. Designed to cater for needs of any size, type or complexity, it employs advanced technology and systems in a modular architecture that provides its customers with economies of scale and significant savings.

The ultra-modern technology of the data center, allows you to store and access your data with maximum security, stability and safety.

With CL8 you can be confident about the physical security of your infrastructure, the performance of your systems and their availability, assured with a 99.987% SLA. You never have to worry about running out of space or power.

Operational Excellence

CL8 data center is ISO27001 and ISO9001 certified securing the quality of services provided. It is also PCI DSS and Tier III certified. CL8 combines state-of-the-art systems and processes to monitor and manage operations 24/7.

Security

The whole site is secured with perimeter fencing, monitored 24/7 by CCTV and on premises security patrols. There are multiple access barriers, including mantraps, contactless key cards and biometric readers. You can also add your own security systems to a Private Room or Cage.

Resilience & Business Continuity

From 24/7 monitoring and alarms for every critical system to incident management and business continuity management, CL8 operates in full accordance with the industry's best practices. High levels of redundancy and service assurance are built into the data center, such as:

- **Connectivity** - dual-entry fiber from local carriers.
- **Power** - two power feeds (A+B) for all equipment, each independently equipped with UPS (2N) and generator backup with full load capacity for unlimited running.
- **Environment** - SLAs on temperature and humidity in line with ASHRAE recommendations; N+1 cooling; sophisticated water and smoke detection systems; advanced fire suppression in line with local regulations and designed for maximum safety and minimum damage.

Sustainability

CL8 uses free cooling as well as hot-aisle containment solutions with InRow cooling systems to prevent hot air recirculation, while improving cooling predictability and efficiency and support higher power densities which results in reducing the overall cooling overhead by as much as 25%.

Services

- Colocation
- Private Suites
- Connectivity
- Remote Hands & Eyes
- Hots Seats / Cold Seats

Services Features

- 24/7 Onsite Network Operations Center
- 24/7 Data Center Access
- 24/7 Advanced Monitoring
- Lockable Storage Rooms
